Level 2 - Working With Asbestos - The Blue Card

The pre-requisite for this course is Level 1-Asbestos Awareness

In the course you will learn to:

- Visually identify "Real" Asbestos products & their risks
- Define non-friable and friable materials
- Introduction to skills to identify the asbestos work you can do to minimise your risk for example: make-safes, small jobs or an emergency versus the jobs you should refer for professional assistance.
- Jobs you can do
- Jobs you can not do
- Check if Asbestos Register Recommendations can be completed by you?
- Key to self instruction on use of Personal Protection Equipment (PPE)
- Completing a work procedure and on-going management
- Provide "How to do it" instructions for the make safes, small jobs or an emergency including:
 - Initiating an emergency procedure
 - Drilling Holes in asbestos Sheeting to fix switches, fittings, fuses and straps
 - Cutting holes in asbestos sheeting for vent pipes, air conditioning outlets, skylights and service penetrations
 - Making safe cracks & exposed edges to asbestos sheet
 - Cleaning up asbestos sheet debris inside & outside & in ceiling spaces
 - Lifting & removing small quantities of asbestos containing floor materials
 - Removal of eaves - *limited to less than 10 sq metres*
 - Removal of external walls - *limited to less than 10 sq metres*
 - Removal of internal walls - including wet areas - *limited to less than 10 sq metres*
 - Removal of fences - above-ground & in-ground construction - *limited to less than 10 sq metres*

Following your training you will be able to do these jobs safely.

Cost \$60 + GST per training participant. **Duration** 1.5 hours

Includes Course Notes you can download and print as a Workbook reference. Course Notes refer to all aspects of the training.

There is an Assessment at the conclusion of the training and when successfully completed you will receive a Blue Card and a Certificate of Completion.

Be Aware - Be Safe - Be Trained
